Manuscripts Preparation

Manuscripts must be written in English with Times New Roman Font, size 12, and should be clear and grammatically correct and plagiarism free. And articles should be divided into following sub sections as mentioned below: Abstract Graphical Abstract Introduction Materials and Methods Results with Tables/figures and Discussion Conclusion Acknowledgements References Appendixes (if necessary)

Title Page

The Title page should contain the Title with concise and as informative as possible , the name(s) of the author(s), the name(s) and address (es) of the institution(s) where the work was carried out, including a valid e-mail address for each author listed in the manuscript. Corresponding author should provide full contact information, including phone number and email address.

Authors must provide short version of title to attract scientific community. Three to seven key terms that are not in the title should also be included on the title page.

Abstract

The Abstract should summarize concisely in no more than 250 words, the rationale, main findings, main conclusions, and wider implications of the study. This should be understandable without citations to the rest of the paper.

Graphical Abstract

Authors are encouraged to provide a self-explanatory graphical abstract of the manuscript and it should be included next to abstract section. In addition, authors may include highlights of the core findings at least 3 bullet points in graphical abstract section.

Introduction

This section should be short and informative without any subheadings. In this section authors should provide background that puts the manuscript into context and allows readers outside the field to understand the purpose and significance of the study. Provide the objective of present work and other relevant information.

Materials and Methods

This part should be presented with clarity and detail. Authors should provide sufficient information with regards to all procedures with proper citations. It can be divided into various subsections based on the experimental design.

Results and Discussion

These sections may be combined as one section and also further divide into subsections with a concise subheading. In this section, authors should discuss and explain how the results relate to the hypothesis and so on. Authors should provide clear and recent citations to support the findings.

Conclusion

Conclusion section should more concise without any references. This section should emphasis on importance of present work, conclusion (should not summarize the work) and future directions.

Acknowledgments

List of all financial/material support and scientific experts who all are involving in this work and provided scientific ideas.

Tables

Tables should be in continuation with text, and should be numbered with a concise and descriptive legend. They should be included in the text of content in a sequential order.

Figures and Legends

Each figure should be inserted along with text where appropriate and labeled accordingly.

References

The correctness of the cited references and other relevant information is the responsibility of the all authors.

Example: Qing D, Duan F, Wang Z. Natural products for health. J Nat Prod Biomed Res, 2017, 1, 1-12.

Books: Qing D, Duan F, Wang Z. Natural products for health. Ed, Vol XX, Publisher, City, year, page numbers.

Citation in the text is by author and year.

Examples:

Qing D, 2017 – One author

Qing D and Duan F, 2017 – two authors

Qing D et al., 2017 – more than two authors

Human and Animal Ethical Guidelines

Authors must be included the ethical committee approval for experimental design in the Materials and Methods section.

Plagiarism

Author(s) are fully responsible for the content and originality of manuscript. After the publication, any concern regarding the published manuscript, Editorial board members have the rights to withdraw the written/published research work before/after publication.

Peer Review Process

All submitted manuscripts will be subjected to confidential peer review by experts as well as editorial board team members in the concern research field and, on the basis of reviewers comments/suggestions, manuscripts will be accepted unaltered, accepted subject to revision or rejected. Confirmation about the acceptance/revision and rejection of the manuscript will be sent to e-mail address of the corresponding author.

Referees

Authors are required to submit, with the manuscript, the names, addresses and e-mail addresses of 3-5 potential referees. Finally, editors have rights to select the reviewer's name for manuscript review process. A peer review system involving minimum two reviewers will be used to confirm quality of manuscripts for publication in the journal.

Copyright

Authors must be signed copyright form and finally send to Editor In-Chief to start the publication process of accepted manuscripts.

Galley Proofs and Publication Process

All the accepted manuscripts send to production to prepare galley proofs and then final Galley proofs sent to the corresponding author through email. Galley proofs are returned to Editor In-Chief or concern responsible person within 5 days of receipt. After the receipt of mail from authors regarding galley corrections, production department will start the publication of manuscript. All published manuscripts will be intimated through appropriate corresponding author email.

Conflicts of Interest

All authors of must disclose any and all conflicts of interest with the publication.
